About Us

Reset Board provides cleared Cyber Compliance, Cyber Engineering, and Defensive Cyber Operations support services for Federal Systems. Our group of nine core personnel has TS//SCI Clearances, CI Polygraphs, and all required DoDD 8570.01 and DoDM 8140.03 Certifications/Education for their respective positions. Our team members are primarily located in Colorado.

Employee Experience

Unique Experience:

- SETA Support for USSF Space Systems Command's Space Domain Awareness Program Office.
 - Worked on the proposal review team for a \$350m contract and a \$100m contract.
- Drafted multiple proposals with associated white papers to successfully convince the USSF SpOC Cyber Chief to grant a special program exception. This saved the program ~\$1.8m and alleviated delay concerns.

Personnel:

- ISSE 4 – 10 Years of Experience, MS, CISSP-ISSEP
- ISSE 4 – 9 Years of Experience, BS, CISSP
- Cyber Systems Admin 4 – 9 Years of Experience, Sec+
- ISSO 3 – 8 Years of Experience, MS, CISSP
- Net Sec Engineer 3 – 8 Years of Experience, MS, CCNA
- Cyber Systems Admin 3 – 7 Years of Experience, Sec+
- Cyber Systems Admin 3 – 7 Years of Experience, Sec+
- Cyber Analyst 2 – 3 Years of Experience, BS, Sec+
- Cyber Analyst 2 – 2 Years of Experience, BS, Sec+

Core Competencies

Cyber Compliance

- Risk Management Framework (RMF)
- NIST SP 800-53r4 and r5
- Joint SAP Implementation Guide (JSIG)

- eMASS and Xacta
- Assured Compliance Assmt. Solution (ACAS)
- SCAP Compliance Checker (SCC)
- Security Impact Assessments
- Negotiation with Authorizing Officials
- Patch Management
- Log Analysis

Cybersecurity Engineering

- System Development Lifecycle (SDLC)
- ERB/CCB Proposals
- Cyber Architecture and Design
- VMWare, Windows, and RHEL
- Test Access Points (TAPs)/Aggregators
- Intrusion Detection Systems (IDS)
- Security Info and Event Manager (SIEM)
- Ansible Automation Platform (AAP)
- Trellix (Formerly McAfee EPO)
- Cisco and Palo Alto Firewalls
- Cross-Domain Solutions (CDS)
- Cisco Identity Services Engine (ISE)
- KG Network Encryptors
- Defensive Cyber Operations (DCO)
- Active Directory, DNS, LDAPS, GPOs
- Cisco Routing and Switching

What Makes Us Different

1. As a team that comes from a technical background, we understand that Cybersecurity is most effective when enforced without impeding mission operations. Our personnel understand the hinderance security controls can have and will work with the Authorizing Official and Engineers to find a pragmatic solution.
2. Our core team was purpose-built from individuals with a proven track record on a variety of Mission System and Enterprise Networks. While much of our team has worked together at one point or another in their careers, they have also excelled on their own.
3. Reset Board started as a Cybersecurity training organization and all our employees have either been formally trained or informally tutored in-house to make sure they meet our expected standards.
